

2009 NH Community Partner Trainings

The Northern New England Poison Center is launching its New Hampshire Community Partner Program in August 2009. We will be training Community Partners to help deliver important poisoning prevention messages at the local level. Possible audiences for the training include educators, law enforcement, school nurses, coalition members, student assistant professionals and emergency responders. If you would like training and tools to educate your community, consider becoming an NNEPC Community Partner.
